Chemical product for leather

SOGRACRYL RS - 859

Chemical nature:	Water emulsion of acrylic co-polymer
Appearance:	Liquid
Solids content:	35 ± 1 %
Ph:	7,0 – 9,0
Ionicity:	Anionic

Applicazioni

RS-859 è un'emulsione acrilica con un film medio molto flessibile usata come componente anche unico nelle rifiniture arredamento per l'ottima stampabilità e rilascio dopo bottatura a secco. Trova anche impiego nelle rifiniture per vernice e abrasivo.

Main applications

RS-859 is a water emulsion of acrylic polymer and it forms medium-soft, very flexible films. Its excellent embossing features make it very suitable as unique binder for furniture articles. It can also be advantageously used for brush-off and patent leather articles.
