Chemical product for leather

SOGRACRYL RS-860

Chemical nature:	Water emulsion of acrylic co-polymer
Appearance:	Milky liquid
Solids content:	35 ± 1 %
Ph:	7,0 – 9,0
Ionicity:	Anionic

Applicazioni

RS-860 è un'emulsione acrilica e forma un film medio duro che trova impiego soprattutto nelle rifiniture arredo e arredo auto per l'ottimo rilascio alla stampa e per le buone caratteristiche di resistenza generali.

Main applications

RS-860 is a water emulsion of acrylic polymer and it forms medium-hard films. Its good plate release and embossing features, together with good mechanical resistance, make it particularly suitable for furniture and car upholstery articles.
